PROFILE

BSc (Hons) Computing student with practical experience in MySQL, SQL, relational database design, JavaScript, HTML and CSS. Developed a secure, normalised MySQL database for a simulated NHS digital transformation initiative and built a responsive e-commerce website with interactive JavaScript functionality, persistent shopping-cart data and accessibility-focused design. Strong professional background in structured problem-solving, customer service, communication and attention to detail, with experience working in fast-paced environments. Seeking an internship, placement or graduate opportunity in software development, web development or database technologies.

TECHNICAL SKILLS

Programming and Web: Python, JavaScript, HTML, CSS

Databases: SQL, MySQL, relational database design, normalisation

Security: Role-based access control, SHA-2 password hashing, AES encryption, SQL injection prevention

Tools: Git, GitHub, Visual Studio, Microsoft Excel

Development Practices: Responsive design, accessibility, data integrity, structured problem-solving

Languages: Romanian (Native), English (C1), Italian (B1), German (A2)

SELECTED PROJECTS

NHS Trust Database — MySQL, SQL, Relational Database Design, Database Security

- Designed and implemented a normalised relational MySQL database for a simulated NHS digital transformation initiative, replacing unstructured Word and Excel records with a structured system for managing patients, doctors, clinics, appointments, medications and prescriptions.
- Applied 1NF, 2NF and 3NF principles across six related tables, using primary/foreign keys and UNIQUE/CHECK constraints to maintain data integrity and reduce redundancy.
- Developed SQL reporting and automation features including aggregation and joins, DENSE_RANK(), a stored procedure for appointment booking, and a trigger for normalising doctor specialities.
- Implemented role-based access control for doctor, receptionist, administrator and patient roles based on the principle of least privilege.
- Secured sensitive information using SHA-2 password hashing and AES encryption, with prepared statements used to help prevent SQL injection.
- Enforced business rules at database level, including weekday working-hour restrictions and prevention of duplicate appointments.

Beauty E-Commerce Website — HTML, CSS, JavaScript, Responsive Design, Accessibility

- Live Demo: [add live link]
- Developed a responsive e-commerce website from scratch using HTML, CSS and JavaScript, featuring 16 products across four categories.
- Implemented live product search and filtering, product-detail modals, product variations, shopping-cart functionality and persistent cart data using localStorage.
- Built client-side checkout and enquiry-form validation, with responsive layouts designed for mobile, tablet and desktop.
- Applied semantic HTML, accessible form labelling, ARIA attributes and keyboard-accessible interactive components to improve usability.
- Used Lighthouse testing to identify and resolve accessibility and performance issues, achieving 100 scores across Performance, Accessibility, Best Practices and SEO on the products page.

EDUCATION

BSc (Hons) Computing — Bath Spa University

Feb 2025 – Present

Relevant areas: databases, algorithms and software engineering.

BA Philology (English and German) — Alexandru Ioan Cuza University of Iasi

Sep 2013 – Jul 2016

PROFESSIONAL MEMBERSHIP

Student Member — British Computer Society (BCS), The Chartered Institute for IT

Aug 2026 – Present

PROFESSIONAL EXPERIENCE

Cashier

Primark

May 2025 – Aug 2026

- Provided accurate and efficient customer service in a fast-paced retail environment while operating tills and handling cash in accordance with company procedures.
- Resolved customer queries and returns professionally while collaborating effectively with colleagues.

Client Service Analyst with English and Italian

Amazon

Jun 2022 – Aug 2023

- Resolved vendor enquiries and complaints using structured problem-solving, investigation and clear communication.
- Maintained product and catalogue accuracy and compiled performance reports against company standards.

Delivery Assistant

Zara

Aug 2021 – May 2022

- Coordinated overnight deliveries and product unpacking while maintaining health and safety standards.
- Worked efficiently to meet operational requirements in a fast-paced environment.

Visual Merchandiser

Zara

Nov 2017 – Dec 2019

- Created visual displays supporting sales and brand presentation.
- Trained and supported a small merchandising team.

Sales Assistant

Zara

Oct 2016 – Nov 2017

- Delivered customer service and product recommendations while supporting staff training and till operations.

Customer Support with English and Italian

Besedo

Jul 2015 – May 2016

- Provided multilingual email support in accordance with publication rules, escalating technical issues to second-line support when required.
